Dear Sir/Madam,

I am writing to express my interest in the Frontend Developer Paid Internship program provided by yo company. I found about your intern position from Polifest jobs exposition and, after visiting your have immersed myself in your outstanding work in software development. My greatest interest in software engineering combined with working out your company would be a unique and enriching experience for both parties.

I am currently my majoring in computer science, and receive my degree in 2025. While I have a comprehensive C, C++ and Java background, my emphasis is on UI/UX design, frontend and web development. I feel that you share the same interest with me. I am convinced that being an intern in your company, will represent an opportunity for me to apply, and further develop my technical abilities, while gaining experience in order to become a professional.

Up to this moment, I have worked on some personal projects, such as the developing a HTML and CSS small webpage in Romanian about the basics of C++. By creating it, I have learned how to better use the Web technologies and how to write articles. Another personal project I worked on is MatrixEx as a program written in C that makes calculus on a matrix. I have tried to develop this program believing that I can help teenagers that struggle with the oh Matrixes in high school.

I would like to have the opportunity to meet you in person and discuss the internship opportunities you have available. I believe that my skills, qualifications and personal qualities will add value to your organization.

Yours truly,
Maria-Teodora Popescu
